SCREEN VIBRATING

FOR FEEDING OF
PRIMARY CRUSHER

Screen is a kind of equipment by which you can detach materials from one another and put them separately. Its basic function is vibration and through shuddering and vibration separates materials from one another. The driver force behind the screen is produced by an electric motor and through drive shaft is then transferred to the screen. This main axis of the screen is made from resistant steel that through two full-rotation roller bearing in the center of the screen is connected the main body.

Model	Desk NO.	Power (kw)	Capacity (t/h)
5x1	1-3	7.5	80-100
5x1.5	1-3	11	100-140
6x1	1-3	11	80-120
6x1.5	1-4	11	140-200
6x2	1-5	15	180-300
